The Obstetric Anaesthetists' Association (OAA) was formed in 1969 to promote the highest standards of anaesthetic practice in the care of mother and baby. With an international membership of over 2000, the Association provides both a focus for anaesthetists who want to improve the care and safety of women in childbirth and a resource for women seeking information about pain relief in labour ...

Scimitar syndrome, or congenital pulmonary venolobar syndrome, is a rare congenital heart defect characterized by anomalous venous return from the right lung (to the systemic venous drainage, rather than directly to the left atrium). This anomalous pulmonary venous return can be either partial (PAPVR) or total (TAPVR). The syndrome associated with PAPVR is more commonly known as Scimitar ...

Electrocardiography (ECG or EKG) is the process of recording the electrical activity of the heart over a period of time using electrodes placed over the skin. These electrodes detect the tiny electrical changes on the skin that arise from the heart muscle's electrophysiologic pattern of depolarizing and repolarizing during each heartbeat. It is very commonly performed to detect any cardiac ...

Calcific aortic valve stenosis is a common valve pathology that increases in prevalence with advancing age. Economically developed countries have witnessed a significant shift in the etiology of valve disease characterized by a marked decline in rheumatic heart disease and a rise in age-related degenerative valve disease such as calcific aortic stenosis, a pattern expected to be mirrored by ...
