Computer Networking: A Top-Down Approach Featuring the

alike have confirmed that this top-down approach has many advantages and does indeed work well pedagogically. First, it places emphasis on the application layer (a â€œhigh growth areaâ€• in networking). Indeed, many of the recent revolutions in computer networkingâ€”including the Web, peer-to-peer file sharing, and media

It's an amazing book about Computer Networking. Gave me a great in-depth intuition of how the Internet works and all such networks in general. The approach from the Application layer downwards was just the right one for me. I had tried to learn computer networks before - starting from the lowest layer - and didn't get very far.

COMPUTER NETWORKING A TOP DOWN APPROACH SOLUTIONS 6TH PDF
Network architecture refers to the organization of the communication process into layers (e.g., the five-layer Internet architecture). Application architecture, on the other hand, is designed by an application developer and dictates the broad structure of the application (e.g., client-server or P2P).
