A primer on Machine Learning for Data Science. Revealed for everyday people, by the Backyard Data Scientist.

## **Introduction to Machine Learning for Data Science | Udemy**

Machine learning is about teaching computers how to learn from data to make decisions or predictions. For true machine learning, the computer must be able to learn to identify patterns without being explicitly programmed to.

### **How to Learn Machine Learning, The Self-Starter Way**

Gradient boosting is one of the most powerful techniques for building predictive models. In this post you will discover the gradient boosting machine learning algorithm and get a gentle introduction into where it came from and how it works.

### **A Gentle Introduction to the Gradient Boosting Algorithm**

Statistical methods are used at each step in an applied machine learning project. This means it is important to have a strong grasp of the fundamentals of the key findings from statistics and a working knowledge of relevant statistical methods.

### **Statistics Books for Machine Learning**

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised.. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...
