Dust has a tendency to build up inside the DVR case, leading to a high risk of failure or even fire. • Only install the DVR in a well ventilated space. Like all electronics, the circuitry and hard drive in the DVR produce heat, and this heat needs a way out. • Do not open the DVR case except to install/swap the hard drive or battery inside.

The advanced video codec used by the DVR, called H.264, offers high quality video files at a fraction of the size of older video codecs such as MPEG-2 or similar. Basically, this means you can store more footage on the DVR's hard drive, and that the quality of that footage can be significantly higher than many older video formats.
