Visual thinking, also called visual/spatial learning or picture thinking is the phenomenon of thinking through visual processing.. Visual thinking has been described as seeing words as a series of pictures. [citation needed] It is common in approximately 60-65% of the general population. "Real picture thinkers", those who use visual thinking almost to the exclusion of other kinds of thinking ...

When I run my code, the ball moves!! Not well, but it moves! Each drawing of the ball is being left on the playing field. In Processing, to start each drawing cycle with a clean window, you set the background of the window. Here, I'll set it to a solid color using the RGB color model: (255, 255, 255), which is the value I want for red, green, and blue components of the color.

What is critical thinking? Nobody said it better than Francis Bacon, back in 1605: . For myself, I found that I was fitted for nothing so well as for the study of Truth; as having a mind nimble and versatile enough to catch the resemblances of things and at the same time steady enough to fix and distinguish their subtler differences; as being gifted by nature with desire to seek, patience ...

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.
